BRAND & LOOK
- Brand: "Jai Ambey Accessories" — car accessories wholesaler in Karol Bagh, New Delhi, 20+ years.
- Background: warm near-black #08070A with a slow, glowing red light behind the phone — like a curved
  planet horizon / soft aurora, deep red #D73630 / #E5352B fading to warm orange-red #FF6A4D with a soft
  white core. Subtle film grain, no clutter.
- A modern black smartphone (thin bezels, rounded corners) floats centre or slightly left, with a soft
  red rim light and a gentle reflection under it.
- The phone screen shows ONLY the screenshot I provide for each scene. Never redraw, translate, blur or
  change any text, price, button or photo on the screen. Keep it sharp and readable.
- Typography for on-screen captions: bold geometric sans (like SF Pro Display / Inter / Poppins Bold),
  white, tight letter spacing; small grey (#B8B0B4) sub-captions. Captions sit on the right third.
- Highlight colour: brand red #E5352B; success colour: green #25D366 (only for "order placed").

MOTION
- Apple-keynote style: slow push-ins, smooth 3D phone tilts (max 12°), parallax background glow.
- Easing: ease-in-out (cubic), no jerky moves, no fast spins. Transitions 0.4–0.6 s: soft zoom-through
  or slide with motion blur.
- Show taps with a soft white finger-tap ripple (circle that expands and fades) exactly on the button
  being explained, then a red rounded-rectangle highlight around that button.
- Zoom into the important area (button, price, search bar) up to 1.6x, hold 1.5 s, zoom back.
- Captions animate in word-by-word (slide up 12 px + fade), out with a fade.

AUDIO
- Hinglish voiceover, warm and friendly male or female Indian voice, clear and slow (about 130 words
  per minute), like a shop owner explaining to another shop owner.
```

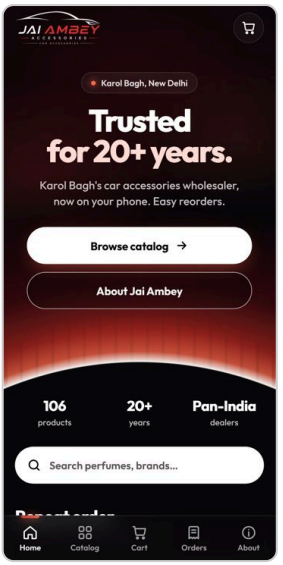

```
- Light, modern, positive background music (lo-fi / corporate tech), ducked under the
voice.
- Soft UI sounds: tap "click" on every tap, a light "whoosh" on transitions, a pleasant
chime on
  "Order placed".

AVOID
- No fake app screens, no invented buttons, prices, phone numbers or UPI IDs.
- No people's faces, no stock-footage people, no 3D cartoon characters.
- No text on screen other than the captions given per scene.
- No flicker, no warped phone, no melting text, no watermark.
